#### Comments

##### Participation ballot #7 (200B0)

It's good

##### Participation ballot #9 (200B0)

She sometimes goes a bit quickly, but still explains very well.

##### Participation ballot #15 (200B0)

It is sometimes difficult to follow, however it clears up at some point.

##### Participation ballot #17 (200B0)

I think she is very intelligent although has a hard time explaining to the class what she is trying to say. she does not give any explanation to any concept in class and only gives examples of certain things, not giving us a clear example we can work off of.

I would recommend to let us try out some examples individually during class to help us remember what we just learnt

**Participation ballot #17 (200B0)**

I am not a person who would consider themselves a genius in the math subjects, but I do tend to understand most of the time. I find it hard to understand the concepts in class because all we do are examples.

It would be nice to revisit old concepts a bit more when using them again, while she does do recalls sometimes students just forget the material completely

**Participation ballot #17 (200B0)**

I tend to understand the class material more when I am with my tutor, but that has nothing to do with me being in class, I just prefer the one on one method, although I think she could be more clear in class and give more theory on the subjects.

**Participation ballot #18 (200B0)**

Many concepts are easy to grasp however it's the practice that is difficult. Cal2 is all about recognizing certain patterns and having an intuition for it and that is very difficult

**Question 23**

*What are some of the things that the teacher does that you find particularly helpful.*

18 participants answered this question.

'no opinion
'she does a lot of examples in class
'She gives decent amount of practice problems to prepare for the exam
'The teacher often does a variety of exercises that are based on the course contents, which helps me in becoming more familiar with different types of questions.
'After the test has been completed, she sends an online copy to us with the answers so we can practice them again at home. Let's us see where we went wrong during the test.
'makes us answer questions so that we stay focused on the lecture
'She takes a break after teaching a concept so that students can have the time to note it down and fully understand it.
'the web works are great
'She explains the content well and gives a lot of examples
'she's very sweet & approachable, is patient when we have questions and always answers them until we understand. her office hours are convenient if we have any additional questions. she stays true to the course outline so if you ever need to miss a class you can always follow along & keep up to date
'Every topic is taught along the same structure, which makes note taking fairly easy and simple to follow
'Her notes are very organized
'The teacher provides a lot of practice problems and homework for the students in an attempt to ensure their development.
'I find the summaries that the teacher provides at the end of covered topics very helpful. Also, I find the examples done in class helpful. The teacher's enthusiasm makes the course material more interesting.
'She sometimes summarizes material which is nice. She also posts a lot of supplementary exercises on LEA.
'When she does examples on the board.
'I know she tries her best to explain everything to the best of her abilities but I do not find her teaching method to be very effective.
'Gives us a lot of information and shows us cool facts and things she finds neat

**Question 24**

*What are some of the things the teacher could start doing in order to help you learn better.*

18 participants answered this question.

'nothing much
'Explain some of the theory behind some of the course topics a bit more in depth.
'To help me learn better, she can go slower with the material if possible, and maybe go over some homework problems in class.
'give us some examples to try and complete in class, and that we complete everyone together afterwards
'Speak with a louder voice
'let us do individual questions in class and I sometimes find words and questions in the homework that we seem to have never talked about which makes it very difficult
'I think it would be helpful for the homework to have some easier questions so that it will help when we first start learning the subject.
'I have no complaints,
'Offer times during class where instead of her going through an example, we try one for ourselves and she corrects in 5-10 minutes later. I would find that SUPER helpful, because the only time I practice outside of exam prep is during webworks, and i typically only do those a few days after the material was covered in class.
'To give harder examples and to try to give more tricks to recognize better the material. Also give extra exercise to do in class on our own like we can practice with her being there.
'Slow down and do a recap after each subject/class, the sheer volume of material is confusing and a recap would be most helpful.
'Sometimes I find that it would be helpful if the teacher wrote more titles about the topics we are covering. Also, making a step by step plan to help us solve certain types of problems would be helpful.
'Be more available (especially office hours). Use at least a few harder or special examples like the exercises she posts in Webworks.
'Asking us to solve some problems on our own could be interesting.
'I think she should implement some course notes into her teaching, where it is easy to follow and not all over the place. My note book is a mess and I find it hard to review, I often just search up videos on line to review the theory we learn because we did not get a good base for the new subjects we learn.
'In class practice, write down on the board a few problems and give the students some time to try it out instead of doing examples and exercises with us

**Question 25**

*What are some of the things that the teacher should stop doing in order to help you learn better.*

18 participants answered this question.

'_
'N/A
'In order to help me learn better, she should go slower through the questions and explain each step a bit more thoroughly.
'some webworks took too long to complete therefore forcing me to use online ressources, because I need time to study for other classes
'Nothing really
'nothing
'None
'n/a
'Nothing really
'She goes very fast in class and it doesn't really gives us the time to completely understand
'Stop going so fast.
'Nothing.
'Nothing?
'To solve all the problems on the board.
'I don't think she should stop, I think she should just add more.
'nothing really maybe just more practice rather than examples

**Question 23**

*What are some of the things that the teacher does that you find particularly helpful.*

15 participants answered this question.

'The homework she assigns helps us practice the material.
'She repeats material and goes over things we do not understand.
'Goes over the solutions to the quiz immediately after we complete it
'Give us extensions if we need them.
'asks if we have questions
'she reviews a lot when teaching new things, she's very available for help outside of class, gives a lot of examples
'she lets us ask questions if we do not understand
'no comment
'She gives lots of exAMPLES.
'she is available during office hours to help
'Asks the class if we have any questions
'The comments she leaves on exams and her office hours
'Providing a lot of examples,
'gives many examples in class.
'shows us a lot of examples, however we are not very engaged in them

**Question 24**

*What are some of the things the teacher could start doing in order to help you learn better.*

15 participants answered this question.

'Explaining topics a few different ways for kids that didnt understand the first time
'She can try to speak louder and show us examples and give us homework that are similar to the questions she would give us in exams, rather than showing us the basics and expecting us to be able to answer difficult questions on our own.
'Spend more time doing in class exercises where we do the work and ask for help
'Give us better examples to do in class so we are not lost during quizzes and tests.
'spend more time on difficult subjects
'examples that are the level of difficulty of the exams, sometimes, it seems like the exams are way more challenging than the exercises and homework
'It would help a lot if she would talk much slower and write notes on the board in a more organized manner. ie: better separation of topics
'She has never mentioned her office hours, or offered extra help she does not give practice work
'Allow us to do problems in class individually and ask her questions.
'we should be learning harder examples to help us further understand the material. Also, the explanations should be clearer so that we can fully understand what she is talking about.
'Explain every step better and in depth.
'Cover harder topic in class
'Everything is already good
'giving much harder examples in class similar to the homework
'engage the class in the examples done on the board, organize material better

**Question 25**

*What are some of the things that the teacher should stop doing in order to help you learn better.*

15 participants answered this question.

'Decrease the difficulty of the tests
'She should not assign assignments and homework that are not representative of the questions given in exams.
'
'Making the quizzes and tests completely different from the class notes
'longer deadlines for webwork
'nothing
'Talking so fast
'answering questions that further confused us
'Giving too many examples and not spending enough time making sure we get to try problems.
'She should stop grazing through examples without fully explaining what she is doing so that we can understand why she is doing an example a certain way, she should explain what she is doing in detail so that we can do the same by ourselves without having to teach ourselves how to do what we have in our notes.
'No answer.
'Nothing
'Nothing
'nothing
'stop giving us assignments on work we never learnt

**Participation ballot #5 (20012)**

it would be helpful to get more time in class to practice the material to make sure we understand the subject before moving on (exercise periods)

**Participation ballot #6 (200B0)**

exercises and examples in class more similar to exam level questions

**Participation ballot #7 (20012)**

Give us exercise/problem sessions and webworks that are closer to the material we do in class.

**Participation ballot #14 (200B0)**

Super nice. My one complaint is that the homework she gives is impossible compared to class and we need to do more difficult examples. Also, maybe let us try some by ourselves in class

## Methodology

This consultation was conducted via Omnivox from November 29, 2019 at 08:30 until November 29, 2019 at 09:30. 15 respondents participated.
